

# Soil Sampling Equipment

## *En Novative Disposable Soil Samplers*

### En Core® Soil Sampler

The patented En Core® Sampler conveniently collects and stores soil samples with one easy-to-use device. Its self-contained package features an airtight cap that preserves the sample for lab analysis. Besides its ease of use, the disposable En Core® Samplers have a minimal handling design which avoids many of the problems of alternative soil sample collection techniques.

#### FEATURES

- Easily collects, stores and delivers accurate soil samples in a self-contained package
- Available in 5 gram and 25 gram versions
- No need for methanol or sodium bisulfate preservation
- Made of inert composite polymer materials
- Tested for purity and leak-proof performance
- Instructions included with each sampler

### Terra Core® Soil Sampler

The Terra Core® Sampler easily collects size or dry weighted soil sample cores, then transfers them to a user provided 40ml glass VOA for in-field preservation and transport. Terra Core® is a cost effective, one-time use tool for sampling method USEPA SW-846 Method 5035. Its disposable design eliminates the need for additional tools.

#### FEATURES

- Easily collects soil samples and transfers them into an appropriate container
- Available in 5 gram and 10 gram versions
- Quickly release the soil sample by rotating the plunger 90°
- No more cut off syringes
- Available in a case of 100 samplers

### EasyDraw Syringe® & PowerStop Handle® Soil Sampler

The EasyDraw Syringe® & PowerStop® Handle is a simple solution for collecting soil samples in varying soil types. The syringe doubles as a dry weight sample container and collection tool. While the reusable PowerStop handle features adjustable settings to compensate for various soil types.

#### FEATURES

- Easily collects soil samples and transfers them into an appropriate container
- Available in 5 gram, 10 gram, and 13 gram versions
- Quickly releases the soil sample with the one-time use syringe
- Meets demanding performance and cleanliness standards
- Complies with EPA SW-846 Method 5035A
